### Description

Monaco Hedge Selection is a Fund of Alternative Investments funds ("Hedge Funds") established under the law of Monaco with the exclusive objective to invest in "Hedge Funds".

### Investment objective

Monaco Hedge Selection aims to give access to Alternative Investments as an asset category, in order to enable a better diversification of assets within an investment strategy, as the statistical decorrelation between alternative investments and directional products, like stocks or bonds, enables to reduce the overall risk profile.

The fund of fund aims at diversifying its investments at all time, on at least six different alternative investment strategies and at least twenty different Hedge funds. It offers liquidity on a weekly basis.

### Management style

The selection of the different Hedge funds is following the objective to provide the investor with diverse management styles, executed by experienced managers, selected on the Lyxor platform of funds (the Lyxor platform is a group of Hedge funds subject to a thorough, regular and ongoing risk control by Lyxor Asset Management).

Monaco Hedge Selection is managed in partnership between Lyxor Asset Management SA, Paris, who is fund manager delegate on behalf of Compagnie Monégasque de Gestion, and Duemme Hedge SGR, Milan, chosen by Compagnie Monégasque de Gestion as Trading advisor to Lyxor Asset Management.

Both companies are well-established firms in the European alternative investment fund of fund industry, respectively in France and in Italy.

### Investment universe

The investment universe of the fund is defined by the funds on the Lyxor platform. All funds, which may be subject of an investment by Monaco Hedge Selection, offer weekly liquidity.

The strategies represented on the Lyxor platform and likely to be included into Monaco Hedge Selection are mainly the following: Global Macro, Forex, Convertible Arbitrage, CTA, Event Driven, Long-Short Equity, Options Arbitrage, Distressed Securities, Emerging Markets and Fixed Income Arbitrage.

A short description of these strategies is provided in the complete prospectus of Monaco Hedge Selection.

### Special risk information

Potential clients should be aware that the Monaco Hedge Selection fund is a "fonds d'investissement". It is subjected to regulation as described in "Chapitre II" of the "Ordonnance Souveraine" 1.285 of September 10th, 2007, and more particularly in article 60 of the same "Ordonnance". The fund runs its investing activities in conformance with the regulations of articles 57 and 58 of the "Ordonnance Souveraine" 1.285 of September 10th, 2007. The fund is a fund of alternative investment (hedge) multi-strategy funds. Consequently, it is open for subscription to all clients.

## MONACO HEDGE SELECTION Monthly report

Net Asset Value as of January 26th, 2010: 10,872.24 €  
Monthly Performance: -0.2 %

### Performance

**Historic performance**

**Trailing 12 months performance (basis 100)**

Past performance does not guarantee future performance. 2009 performance data is not audited.

### Market strategy

The turnaround seen in equity markets this month, which were up for the year as late as 19 January, brought the main equities indices into negative performance territory in this first month of the year. This movement was accompanied by a sharp rise in the volatility of equities, which resulted in a difficult environment for all strategies based on this asset category. In parallel with this, credit spreads - which are the yield differential the market pays to justify taking on issuer risk - widened, curbing the global trend that had existed since March 2009.

Market developments observed do not lead us to conclude that this trend will be reversed. However, the lack of movements and the increased volatility have affected the performance of trend-following strategies, especially for CTA funds, as well as the performance of long/short funds which tend to perform better when equities rise, and the performance of the convertibles arbitrage funds, which are particularly sensitive to credit developments. The performance of Monaco Hedge Selection was consequently slightly down in this month, at -0.2%, as compared to the performance of the alternative multi-management index, the Lyxor Hedge Fund Index, which was down by -0.35% in the period.
