INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **GLOBAL LUX DETTE EMERGENTE (USD)** is a feeder fund that invests mainly in the fund Neuberger Berman Emerging Market Debt Blend Fund (the master fund). The master fund invests in sovereign and private issuer bonds issued in emerging market countries and denominated either in hard currency or in local currency. The investments denominated in hard currency refer to investments in USD, EUR, GBP, YEN and CHF. The average rating is "Investment Grade". The target allocation for emerging market bonds is 50% sovereign bonds, 25% private issuer bonds in hard currency and 25% sovereign bonds in hard currency. The fund is hedged against the US dollar.

The management is discretionary with a selection process that starts from a macroeconomic analysis and finishes with the stock choices ("Bottom-up"). The fund is diversified across strategies and geographies as well as in terms of the number of positions.

RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

MANAGEMENT COMMENT

In September, the various segments of the bond market were down, both for emerging debt denominated in local currency (-3.37%) and for debt issued in USD (-1.96% for government bonds and -1.37% for corporate bonds). Emerging market debt is suffering from the str

r and the volatility induced by the crisis in the Evergrande real estate sector in China. Car(10) & Car(10) The peak of growth seems to have passed, particularly in Europe, the United States and China. This economic slowdown is accompanied by a rise in inflation, mainly due to the rise in energy prices and the bottleneck in production chains. In this environment, sustained growth and price pressures should push central bankers to normalize their monetary policies. Car(10) & Car(10) Volatile period where market participants are looking to see if inflationary pressures are temporary. However, growth is solid and household cash hoarding and a diminishing pandemic are supporting economic activity and should support risky assets. A sharp rise in rates could derail the markets, but so far central ba pragmatic and will act accordingly to support the economy.
