INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **MONACO PATRIMOINE SECURITE EURO** invests mainly in equity, bond and alternative funds with an equity exposition between 15% and 35% of the total fund.

The management is discretionary and prioritises asset class allocation with a strong diversification across sectors and geographies as well as in terms of the number of positions.

RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

MANAGEMENT COMMENT

International equity markets are down in September (except for Japan): Eurostoxx 50 -3.53%, Nikkei 225: +4.85%, S&P: +2.9%, MSCI Emergents: -4.25%. Risk-free rates have risen in Germany and the United States (+18bp on the 10-year Bund, which has reached -0.20%, and +18bp on the 10-year Treasury, which is around 1.49%). Corporate bond risk premiums have risen (+25 bp, Itraxx 5yr HY and +26 bp CDX 5yr HY). The Europe IG bond indices are down, as is the case with the IcbBofA eur Corporate index (-0.66%).

The peak of growth seems to have passed, particularly in Europe, the United States and China. This economic slowdown is accompanied by a rise in inflation, mainly due to the rise in energy prices and the bottleneck in production chains. In this environment, sustained growth and price pressures should push central bankers to normalize their monetary policies.

Volatile period where market participants are looking to see if inflationary pressures are temporary. However, growth is solid and household cash hoarding and a diminishing pandemic are supporting economic activity and should support risky assets. A sharp rise in rates could derail the markets, but so far central banks have been very pragmatic and will act accordingly to support the economy.
