Published in the "Journal de Monaco" and displayed at CMB Monaco headquarters and in CMB Monaco branches. Our funds' net asset values are regularly published and updated on the website www.cmb.mc

INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **MONACTION EMERGING MARKETS** invests up to 100% of its assets in a Master Fund, Emerging Markets Equities (Class R), managed by RAM Active Investment, whose management objective is to select primarily Emerging or Developing market equities.

The management style follows a systematic and disciplined investment and selection process.

RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

MANAGEMENT COMMENT

In September, emerging equity markets were down -4.25% (MSCI Emerging Markets Index) in line with developed country equities (excluding Japan). Markets are chaotic in China with problems in the real estate sector due to Evergrande, which is close to bankruptcy, but also by the new regulations imposed on the technology sector.

The peak of growth seems to have passed, particularly in Europe, the United States and China. This economic slowdown is accompanied by a rise in inflation, mainly due to the rise in energy prices and the bottleneck in production chains. In this environment, sustained growth and price pressures should push central bankers to normalize their monetary policies.

Volatile period where market participants are looking to see if inflationary pressures are temporary. However, growth is solid and household cash hoarding and a diminishing pandemic are supporting economic activity and should support risky assets. A sharp rise in rates could derail the markets, but so far central banks have been very pragmatic and will act accordingly to support the economy.
