**Net Asset Value publication mode**

Published in the "Journal de Monaco" and displayed at CMB Monaco headquarters and in CMB Monaco branches. Our funds' net asset values are regularly published and updated on the website [www.cmb.mc](http://www.cmb.mc)

## INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **GLOBAL LUX DETTE EMERGENTE (EUR)** is a feeder fund that invests mainly in the fund Neuberger Berman Emerging Market Debt Blend Fund (the master fund). The master fund invests in sovereign and private issuer bonds issued in emerging market countries and denominated either in hard currency or in local currency. The investments denominated in hard currency refer to investments in USD, EUR, GBP, YEN and CHF. The average rating is "Investment Grade". The target allocation for emerging market bonds is 50% sovereign bonds, 25% private issuer bonds in hard currency and 25% sovereign bonds in hard currency. The fund is hedged against the US dollar.

The management is discretionary with a selection process that starts from a macroeconomic analysis and finishes with the stock choices ("Bottom-up"). The fund is diversified across strategies and geographies as well as in terms of the number of positions.

## RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

## PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

CUMULATIVE PERFORMANCE	1 month	1 year	3 years	3y (ann.)	5 years	5y (ann.)

## MANAGEMENT COMMENT

In October, the market indices for emerging debt performed negatively in local currency (-1.4%), while the indices for debt issued in USD remained broadly unchanged (-0.0%) - (J.P. Morgan GBI & EMBI indices).

The prospect of a change in the monetary policy of the US central bank FED, which will become progressively less accommodating with the upcoming launch of "tapering", is largely integrated and does not make the markets tremble. On the other hand, investors are sensitive to the data published in China due to the weakening of the economy in the country over the past few months. Markets remain attentive to the evolution of the health of Chinese real estate developers and to Sino-American relations on the Taiwan issue.

Within the portfolio, among the most notable management actions, the overweight position in Brazil was reduced and Turkey remained underweight due to rising monetary policy and geopolitical risks. In addition, interest rate positions in Asia were reduced, primarily in India, Thailand, and Malaysia, as we prepare for higher yields in the core markets and possible policy normalization.
