## INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **MONACO PATRIMOINE SECURITE EURO** invests mainly in equity, bond and alternative funds with an equity exposition between 15% and 35% of the total fund.

The management is discretionary and prioritises asset class allocation with a strong diversification across sectors and geographies as well as in terms of the number of positions.

## RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

## PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

CUMULATIVE PERFORMANCE	1 month	1 year	3 years	3y (ann.)	5 years	5y (ann.)
FUND (net)	0,66%	6,63%	6,20%	2,03%	6,08%	1,19%

## MANAGEMENT COMMENT

In October, equity markets resumed their march forward. The Nasdaq gained +7.3% and the S&P500 +6.9% ahead of the European indices (Eurostoxx50 +5.0%). Japan suffered (Topix -1.4%) and the Chinese index Shanghai Shenzhen CSI300 only moderately advanced (+0.9%). On the fixed income side, risk premiums in the investment grade category continued to tighten. Overall, premiums are very stable and have been fluctuating in a range of 50bps to 60bps for several months. Finally, rates have evolved in two phases, first rising steadily to -0.09% (German 10-year), before falling back to -0.17%, close to the level of late September (-0.20%).

Risky assets continue to rise after a short consolidation in September. The prospect of a change in the US Federal Reserve's monetary policy, which will become progressively less accommodating with the imminent launch of tapering, has been largely priced in and is not causing the markets to tremble. For the time being, investors do not see any overheating in the US and seem to believe that tensions on supply chains, as well as on employment, will gradually ease as the pandemic risk recedes. High inflation is, therefore, still seen as a temporary phenomenon.

Corporate earnings were good overall but forecasts are cautious. Activity in the primary bond market has slowed and is expected to pick up in November.
