Published in the "Journal de Monaco" and displayed at CMB Monaco headquarters and in CMB Monaco branches. Our funds' net asset values are regularly published and updated on the website www.cmb.mc

INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **MONACTION EMERGING MARKETS** invests up to 100% of its assets in a Master Fund, Emerging Markets Equities (Class R), managed by RAM Active Investment, whose management objective is to select primarily Emerging or Developing market equities.

The management style follows a systematic and disciplined investment and selection process.

RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

MANAGEMENT COMMENT

In October, international equity markets experienced a pronounced dichotomy between, on the one hand, the European and American indices, which performed satisfactorily over the month (the Nasdaq gained +7.3% and the S&P500 +6.9%, outperforming the European indices (Eurostoxx50 +5.0%)), and, on the other hand, the Asian indices, which suffered more, such as Japan and South Korea (Topix -1.4% and KOSPI -3.2%). In the end, the global emerging indices only gained moderately (around +1%).

In general, and after a short consolidation in September, investors are constructive about the post-Covid economic recovery. The prospect of a change in the US Federal Reserve's monetary policy, which will become progressively less accommodating with the upcoming launch of tapering, has been widely accepted and is not causing the markets to tremble. For the time being, investors do not see any overheating in the US and seem to believe that tensions on supply chains, as well as on employment, will gradually ease as the pandemic risk recedes. High inflation is, therefore, still seen as a temporary phenomenon.

However, investors are sensitive to the data published in China due to the weakening of the economy in the country over the past few months, which is weighing on the performance of Asia as a whole. In terms of stocks, automotive companies are experiencing solid gains supported by the end of electronic component shortages.
