INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **MONACTION ASIE** invests in Asian equities with an emphasis on Japanese stocks and is hedged against FX risks.

The management is discretionary and conviction based with a GARP selection process, i.e. privileging earnings growth, strength of the balance sheet and long term gain potential.

RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

FUND MANAGER

SUSTAINABILITY RATING

The rating is expressed as 1 to 5 "globes," whereby a higher number of globes indicates that the portfolio has lower ESG Risk. The number of globes a fund receives is determined relative to other funds in the same Morningstar Global Category.

MANAGEMENT COMMENT

In December, Asian markets ended in a mixed bag. Japanese indices are down -6.7% (Nikkei 225), while Chinese indices continue to rise +0.5% (CSI 300).

As the year comes to a close, the same issues remain. The United States and Europe are facing high inflation, which is mechanically lowering growth, and the rate hikes induced by central banks to counter it are also a drag on activity. In China, the easing of the zero covid policy makes us think that growth will be stronger in the region and more globally. Japan's monetary policy adjustment is weighing on the country's risky assets.

The inflation peak seems to have passed in Europe and the United States, however, central banks should continue to raise rates to counter inflation, but at a slower pace than expected. All else being equal, barring bad news on the inflation front and/or in terms of expected growth, the downside forecasts for the economy seem to have reached a floor. The resumption of growth in China and the resilience of developed countries should support equities, but also bond indices.
