The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. ## MANAGEMENT COMMENT

The 2-year euro sovereign yield continued to fall over the month to +2.34%. The downward trend in inflation towards the long-term target of around 2% encouraged the markets to cut rates. However, the central banks have maintained their key interest rate levels insofar as the job is not yet fully done. These rate cuts have been very beneficial to the fund's performance. The average credit quality is BBB, with a low high yield weighting of 5%, demonstrating the defensive nature of the fund's positioning. The fund has started the new year with a yield of +3.90% gross.
