INVESTMENT UNIVERSE AND PHILOSOPHY

The fund **MONACO CONVERTIBLE BOND EUROPE** invests in European convertible bonds with an average delta of between 25% and 45%.

The management is discretionary and conviction based with a selection process that starts from the stock choices but also includes a macroeconomic analysis ("Bottom-up") and does not have as objective to replicate its benchmark. The fund does not use any synthetic structures.

RISK PROFILE

Lower risk/potential reward

Higher risk/potential reward

The risk indicator increased from 3 to 4 (End of May 2022)

The risk indicator, based on past volatility, cannot cover all types of risks to which the fund may be exposed. It is possible that the past data used does not constitute a reliable indication of the future risk profile. The category associated with this fund is not a guarantee and can evolve with time. The lowest category is not synonymous with a "riskless" investment.

PERFORMANCE

Past performance is not a guarantee of future performance, nor is it constant with time and does not constitute in any case a guarantee of future performance.

MANAGEMENT COMMENT AS OF JANUARY 2024

In January, the fund's benchmark gained +0.42% while the fund posted a slightly negative performance of -0.14% for the month. The German 10-year yield ended the month at 2.17%, up 15 basis points on the end of December 2023. During the month of January the credit market saw a mixed move on spreads while rates started the year repricing part of the rally that started in 4Q and accelerated after mid december. Indices started to perform after mid month closing the periodo substantially unchanged. The convertible market performance was mixed during January with a negative start and a better close of the month with a good directional path granted by a riskon phase in the European equity market. We reduced some position in the period such as America Movil 24 while we added Campari, Saipem and Ubisoft. The equity sensitivity level has been pretty stable at 41% during the month.
