MANAGEMENT COMMENT

The 2-year US Treasury was stable over the month at +4.62%. The probability of a rate cut by the US central bank in June is 53%. The Fed's cautious stance is supported by indicators such as the Core PCE, which is showing a resurgence. Moreover, economic growth does not require an accommodative policy. On the market, yields remain attractive but with credit premiums at low levels. The portfolio's duration has been maintained at a high level, as it is invested mainly in investment grade, with BBB- stocks sold during the month. The fund's carry is +6.11% gross.
